Industry Snapshot

EMPLOYMENT

WAGES

3-Digit Industry	Empl	Avg Ann Wages	LQ	5yr History	Annual Demand	Forecast Ann Growth
Primary Metal Manufacturing	4,369	\$117,648	10.52		357	-1.5%

Employment is one of the broadest and most timely measures of a region's economy. Fluctuations in the number of jobs shed light on the health of an industry. A growing employment base creates more opportunities for regional residents and helps a region grow its population.

Since wages and salaries generally compose the majority of a household's income, the annual average wages of a region affect its average household income, housing market, quality of life, and other socioeconomic indicators.

Staffing Pattern

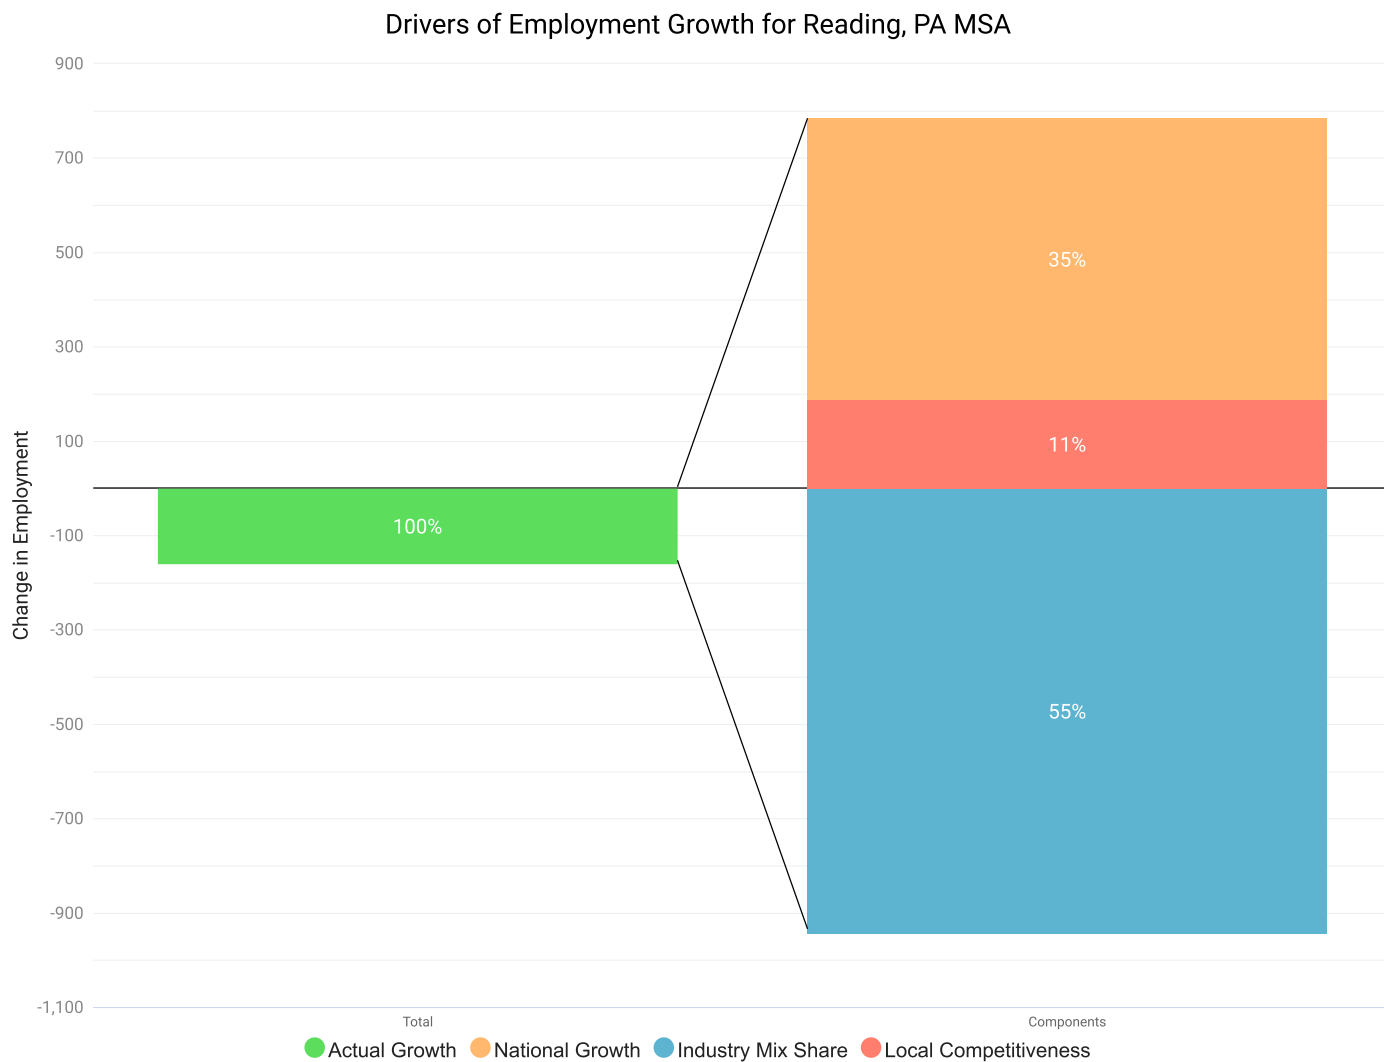

6-digit Occupation	Empl	Avg Ann Wages	Annual Demand
Industrial Machinery Mechanics	297	\$71,200	24
Metal-Refining Furnace Operators and Tenders	281	\$65,100	21
Laborers and Freight, Stock, and Material Movers, Hand	207	\$52,400	23
First-Line Supervisors of Production and Operating Workers	204	\$76,700	15
Rolling Machine Setters, Operators, and Tenders, Metal and Plastic	191	\$58,300	14
Extruding and Drawing Machine Setters, Operators, and Tenders, Metal and Plastic	166	\$56,600	14
Industrial Truck and Tractor Operators	157	\$47,900	12
Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic	156	\$54,200	13
Inspectors, Testers, Sorters, Samplers, and Weighers	121	\$51,400	9
Pourers and Casters, Metal	115	\$48,300	9
Remaining Component Occupations	2,458	\$69,700	179
Total	4,351		

 The mix of occupations points to the ability of a region to support an industry and its flexibility to adapt to future demand. Industry wages are a component of the cost of labor for regional employers.

Drivers of Employment Growth

Over the ten years ending 2023, employment in Primary Metal Manufacturing for the Reading, PA MSA shed 159 jobs. After adjusting for national growth during this period and industry mix share, the part of this employment change due to local competitiveness was a gain of 188 jobs—meaning this industry was more competitive than its national counterpart during this period.

- 💡 Shift-share analysis sheds light on the factors that drive regional employment growth in an industry. A positive change in local competitiveness indicates advantages that may be due to factors such as superior technology, management, and labor pool, etc.
- 💡 National growth is due to the overall growth or contraction in the national economy. Industry mix share is the growth attributable to the specific industries examined (based on national industry growth patterns and the industry mix of the region).

Employment Distribution by Type

The table below shows the employment mix by ownership type for Primary Metal Manufacturing for the Reading, PA MSA. Four of these ownership types — federal, state, and local government and the private sector — together constitute “Covered Employment” (employment covered by the Unemployment Insurance programs of the United States and reported via the Quarterly Census of Employment and Wages).

“Self-Employment” refers to unincorporated self-employment and represents workers whose primary job is self-employment (that is, these data do not include workers whose primary job is a wage-and-salary position that is supplemented with self-employment).

	Empl	%
 Private	4,364	99.9%
 Self-Employment	5	0.1%

Source: JobsEQ®

 Strong entrepreneurial activity is indicative of growing industries. Using self-employment as a proxy for entrepreneurs, a higher share of self-employed individuals within a regional industry points to future growth.

Establishments

In 2023, there were 31 Primary Metal Manufacturing establishments in the Reading, PA MSA (per covered employment establishment counts), a decrease from 36 establishments ten years earlier in 2013.

 New business formations are an important source of job creation in a regional economy, spurring innovation and competition, and driving productivity growth. Establishment data can provide an indicator of growth in businesses by counting each single location (such as a factory or a store) where business activity takes place, and with at least one employee.

GDP & Productivity

In 2023, Primary Metal Manufacturing produced \$1.5 billion in GDP for the Reading, PA MSA.

GDP: Indexed 2013 = 100

💡 Gross domestic product (GDP) is the most comprehensive measure of regional economic activity, and an industry's contribution to GDP is an important indicator of regional industry strength. It is a measure of total value-added to a regional economy in the form of labor income, proprietor's income, and business profits, among others. GDP values shown on this page are nominal GDP data.

💡 Growth in productivity (output per worker) leads to increases in wealth and higher average standards of living in a region.

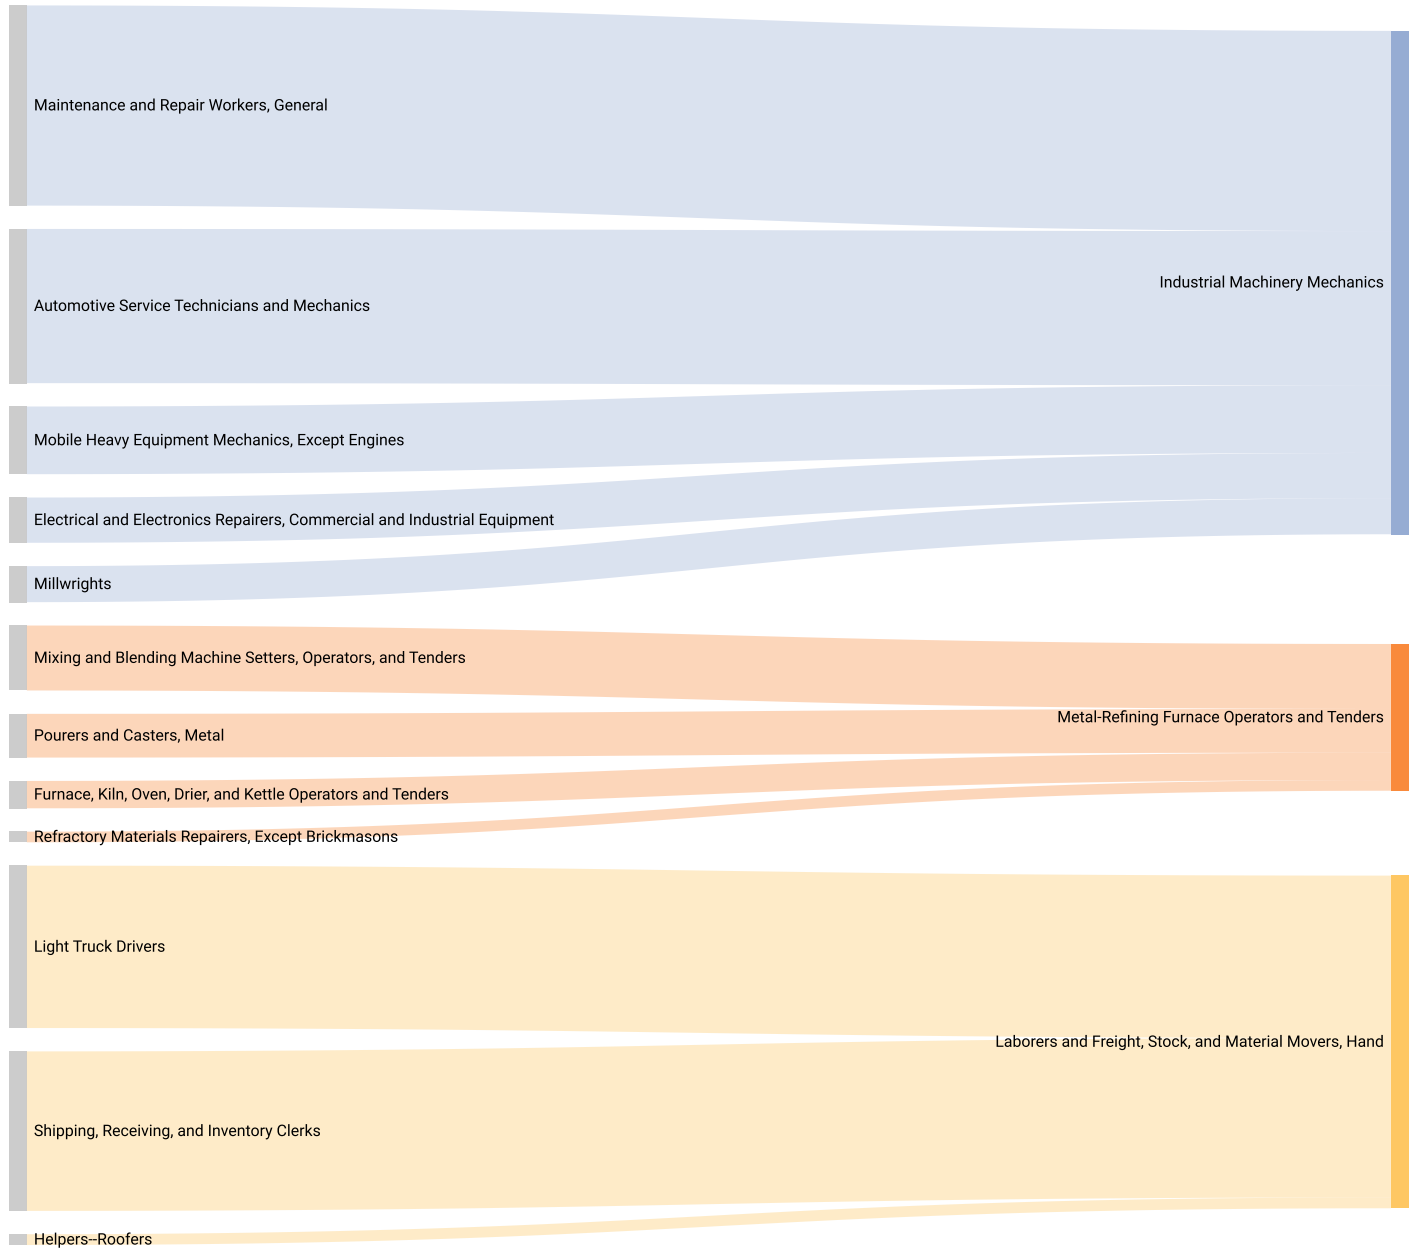

Supply Chain: Top Suppliers

As of 2024Q1, Primary Metal Manufacturing in the Reading, PA MSA are estimated to make \$2.3 billion in annual purchases from suppliers in the United States with about 28% or \$0.7 billion of these purchases being made from businesses located in the Reading, PA MSA.

3-digit Supplier Industries	Purchases from In-Region (\$000s)	Purchases from Out-of-Region (\$000s)
Primary Metal Manufacturing	\$422,549.0	\$21,453.0
Mining (except Oil and Gas)	\$80.0	\$437,422.0
Professional, Scientific, and Technical Services	\$28,708.0	\$167,550.0
Utilities	\$27,612.0	\$79,307.0
Petroleum and Coal Products Manufacturing	\$102.0	\$104,368.0
Remaining Supplier Industries	\$185,061.0	\$872,597.0
Total	\$664,112.0	\$1,682,697.0

 Supplier-buyer networks can indicate local linkages between industries, regional capacity to support growth in an industry, and potential leakage of sales out of the region.

Sector Strategy Pathways

 The graphics on this page illustrate relationships and potential movement (from left to right) between occupations that share similar skill sets. Developing career pathways as a strategy promotes industry employment growth and workforce engagement.

Postsecondary Programs Linked to Primary Metal Manufacturing

Program	Awards
Alvernia University	
Chemistry, General	4
Berks Career & Technology Center	
Welding Technology/Welder	8
Kutztown University of Pennsylvania	
Business Administration and Management, General	240
Chemistry, General	12
Miller-Motte College-Berks Technical Institute

Data Notes

- Industry employment and wages (including total regional employment and wages) are as of 2024Q1 and are based upon BLS QCEW data, imputed by Chmura where necessary, and supplemented by additional sources including Census ZBP data. Employment forecasts are modeled by Chmura and are consistent with BLS national-level 10-year forecasts.
- Occupation employment is as of 2024Q1 and is based on industry employment and local staffing patterns calculated by Chmura and utilizing BLS OEWS data. Wages by occupation are as of 2024, utilizing BLS OEWS data and imputed by Chmura.
- GDP is derived from BEA data and imputations by Chmura. Productivity (output per worker) is calculated by Chmura using industry employment and wages as well as GDP and BLS output data. Supply chain modeling including purchases by industry are developed by Chmura.
- Postsecondary awards are per the NCES and are for the 2021-2022 academic year.
- Establishment counts are per the BLS QCEW data.
- Figures may not sum due to rounding.

Region Definition

Reading, PA MSA is defined as the following counties:

Berks County, Pennsylvania

FAQ

What is (LQ) location quotient?

Location quotient is a measurement of concentration in comparison to the nation. An LQ of 1.00 indicates a region has the same concentration of an industry (or occupation) as the nation. An LQ of 2.00 would mean the region has twice the expected employment compared to the nation and an LQ of 0.50 would mean the region has half the expected employment in comparison to the nation.

What is annual demand?

Annual demand is a of the sum of the annual projected growth demand and separation demand. Separation demand is the number of jobs required due to separations—labor force exits (including retirements) and turnover resulting from workers moving from one occupation into another. Note that separation demand does not include all turnover—it does not include when workers stay in the same occupation but switch employers. Growth demand is the increase or decrease of jobs expected due to expansion or contraction of the overall number of jobs.

What is the difference between industry wages and occupation wages?

Industry wages and occupation wages are estimated via separate data sets, often the time periods being reported do not align, and wages are defined slightly differently in the two systems (for example, certain bonuses are included in the industry wages but not the occupation wages). It is therefore common that estimates of the average industry wages and average occupation wages in a region do not match exactly.
